S05

(S04 + 4x J +8x Long Bolt +8x C + 8x D)

Installation Safety

Install strictly in accordance with the steps in this manual. DO NOT skip steps, install in reverse, or modify the structure without permission, otherwise it may lead to structural failure and collapse.

Wear protective gloves during installation. Maintain good communication between 2 operators. DO NOT forcefully move the uprights alone to prevent tipping and injury.

All bolts and nuts must be fully locked with a wrench. DO NOT tighten by hand, otherwise they may loosen and cause collapse during use.

DO NOT install on uneven or soft ground. DO NOT place sundries under the rack. The original foot pads must be used to adjust the levelness.

Usage Safety

This product is only used for storing dumbbells and fitness accessories. DO NOT use it as a ladder or seat, and DO NOT climb or stand on it, otherwise it may cause structural deformation and personal injury from falling.

Strictly comply with the load limit: maximum load per layer is 100kg, maximum total load of the rack is 300kg. DO NOT overload.

Handle dumbbells with care. DO NOT throw or smash them. Place them smoothly in the center of the tray. DO NOT place them unilaterally or beyond the edge to prevent slipping and injury.

Children are prohibited from touching or using the product alone. DO NOT chase or play around the rack to prevent personal injury.

DO NOT use for a long time in humid or corrosive environments to prevent metal rust and strength reduction.

Maintenance Safety

Check the locking status of all bolts and nuts weekly, and re-tighten immediately if loose. Check the structure for deformation, cracking, and rust monthly, and stop using immediately if any abnormality is found.

Clean with a dry cloth. DO NOT rinse with a large amount of water or use corrosive cleaners to prevent rust and paint peeling.

When not in use for a long time, remove all dumbbells and accessories, and place the rack in a dry and ventilated environment to avoid moisture and sun exposure.

If the structure is obviously deformed or cracked, stop using immediately. DO NOT repair by yourself, and contact after-sales service.

After-Sales Instructions

If there are problems such as missing parts, deformation, or structural abnormalities during installation/use, please stop the operation immediately and contact the after-sales customer service for professional solutions. Unauthorized modification and repair will void the warranty.
